CANDIDATE SUMMARY

Glen Barton – Best International Résumé

Spelling and grammar are Australian. For your convenience, layout is U.S. standard Letter size.

Glen Barton demonstrates the career history of an exceptional high achiever. He is a friendly, outgoing individual able to relate to and socialise comfortably with all levels.

He had taken a break from selling veterinary medical supplies to run his own franchise with outstanding success but now wanted to get back into the medical sales field, this time in pharmaceuticals for people and targeting specialists.

He came to me on a referral from a recruitment company and at first I compiled a reverse chronological resume for him with a synopsis of his key selling achievement near the top. However, once again the rigid pharmaceutical recruitment industry failed to see beyond his recent position as a fast-food franchise operator and he had little success.

By working outside the accepted format of résumé construction and placing his exceptional experience in selling veterinary medical supplies – despite this position being 5 years ago – on the first page under *Relevant Professional Experience* and delegating his current experience to the second page –with no reference made on the first page – under *Recent Professional Experience*, this very slight psychological twist made all the difference and he is now building territory servicing the medical and hospital specialist field.
