PROFESSIONAL EXPERIENCE & ACHIEVEMENTS

LOGISTICS AND INVENTORY MANAGER

02/2001 to Present

US Army Reserve, 999th Transportation Company, Fort Anywhere, IL

Direct all aspects of logistics, maintenance, inventory handling, and control of up to \$2M of equipment and materials using automated property and accounting systems. Provide and coordinate technical support and guidance to subordinate teams. Subject matter expert providing advice and assistance on all logistics and inventory issues with senior management.

Highlighted Duties:

- Maintained 100% control over \$2M in equipment and property accountability and availability.
- Enforced all safety regulations and requirements focused on risk reduction and mitigation of accidents and injuries, resulting in a zero percent accident rate.
- Provided resource referrals and services to reservists and families as Family Support Group Leader, directing activities of five volunteers and achieving favorable rating from regional management.
- Managed and updated policies and procedures for logistics and inventory systems and controls.

Accomplishments:

- Directed all aspects of large relocation effort for equipment and materials to new location in compressed time frame, coordinating disposal of obsolete equipment and hazardous materials and reducing transportation costs by 25% through strong vendor negotiations utilizing alternative methods and tight project coordination.
- Developed alternate logistics support methodology in providing six training missions for remote staff, allowing full participation while reducing transportation expenses from \$48K to \$5K.

Overview - "Chantal Smith" Military Transition Resume

This client, a career Sergeant, had an extensive background in logistics, the targeted civilian profession. In addition to demilitarizing the Army terminology, I focused on solid use of keywords associated with the logistics field including the word logistics itself (13 uses), inventory (10 uses), and materials (7 uses) and featured other important keywords and phrases such as procurement and records management.

While the candidate did not have a degree or even the majority of credits earned, she felt strongly about including a statement to indicate active progress in that direction.

Elements included to strengthen the candidacy include:

- The candidate's focus on safety, safety programs, risk reduction and zero defect results - important in logistics and materials handling.
- The candidate's proactive expertise with efficiency and cost-savings.
- The candidate's ability to work effectively with multiple management and staff levels.
- I included a feature box with transferable skills and the top three attributes making the top third of page one the main selling section.
- Strong supervisor quote to intrigue the reader and provide 3rd-party validation.
